Title notes (1)

The Hundreds Board and Manipulatives kit includes both a Number Board and a Grid Board, along with two sets of manipulatives – numbers and shapes. The numbers (1-100) appear on white squares with both black print and UEB braille characters. The design is usable for both print and braille users, making it suitable for all classrooms! The shapes (red circles, blue squares, green triangles, and yellow stars) can be used for a variety of activities. This kit is a great addition to the Countdown to 100 Days of School Kit.
