

Maximizing Accessibility and Learning with Slide Presentations

February 4, 2021 | 4:00 p.m

Presented by:

Rachel Schultz, MA, Accessible Educational Materials Specialist, AT&AEM Center at OCALI;

Jennifer Govender, M.Ed., Accessible Educational Materials Specialist, AT&AEM Center at OCALI.

Slide presentations are commonly used by educators to convey information and ideas to students. Students with disabilities may encounter barriers within presentations that limit or prevent access to information. Learn about the importance of accessibility, how to build an accessible presentation, and how to utilize tools to increase access. Activities for application will be included.

Supporting Resources:

Color Contrast

The Web Content Accessibility Guidelines has a [Color Contrast Checker](#)

North Carolina State University provides the [Color Contrast Analyzer](#) as a Chrome add-on.

Alternative Text

Learn more about alt text and accessible images with the [Poet Training Tool](#) from the Diagram Center.

Additional Resources

For additional information about increasing access to multimedia curriculum and classroom-based materials check out our previous InspireD on [Accessible Instructional Videos](#).
