

Taking My Temperature

People use a thermometer to take a person's temperature.

A thermometer will show if I have a fever or if I am getting sick.

Before I go to school, I will need to get my temperature checked.
If I have a fever, I will need to stay home and not go to school.

If I go to school, I may need to have my temperature taken again, even if I don't feel sick.
Everyone has to get their temperature taken.

It is OK for someone to take my temperature.
My school and my family want me to be safe and healthy.
